## SKILLS SUMMARY

JavaScript

Vue 3

MVCS

HTML5

CSS3

Bootstrap

Git

Node.JS

MongoDB

Restful APIs

Auth0

Agile

SCRUM

## APPLICATIONS

### GameQ | Collaborator

- Collaborated on a full-stack game night management system. Allows users to add board games to their closet, host a game night or enter another users game night via 6 digit pin, join said game night, upload games to the queue, and vote on games the user wishes to.

-Assisted with product owner decisions, stand ups, sprint reviews, code reviews and Github repository branching and merging.

### Tower | Individual

-Built a full-stack event managing application using Vue 3, JavaScript, HTML5, CSS3, Node.js, MongoDB, Mongoose, Auth0 and developing a Restful API.

-Completed in 4 days by implementing SCRUM methods

# SCOTT BICKISH

## SOFTWARE DEVELOPER

### SUMMARY

Software developer with creativity and empathy. Successful in creating user-friendly full stack applications and learning new technologies quickly. A background in leadership and customer service provides ability in building client and coworker relationships along with great problem solving skills. Delighted to engage in collaboration that uplifts and strengthens original ideas that results in powerful innovation.

### WORK EXPERIENCE

#### CodeWorks | Student

Oct 2021 - Jan 2022

- Currently completing approximately 500 course hours and 20 projects to learn new technologies and best practices in software development from senior developers.
- Designed several full-stack applications individually and collaboratively.
- Implemented SCRUM methods and object oriented programming to complete full-stack application with a group of 5 developers.

#### Valley View Landscape | Foreman

Jan 2021 - Aug 2021

- Ran a crew of 10 employees to fully landscape houses with a high level of organization and accuracy.
- Tasks included running heavy equipment, sprinkler, tree, plant, sod, rock and or mulch installation.
- This position required troubleshooting to many different kind of problems including sprinkler, tree, shrub, and plant problems

#### Cold Chain LLC | Production

Jul 2019 - Dec 2020

- Building and fabrication of freezer doors and parts for large food processing warehouses.
- Production included welding, assembling parts by hand, ATDO, door building, crating, header building, and line-x spray
- Very often it was expected of production crew members to build prototype parts following blueprints to fit customer needs.
